EXPERIENCE

From the Ground Up Tour · I wear all the hats

since Mar 2026

- **Rapper:** Presented 16 concerts (and counting) for hundreds of people of all ages
- **Booking agent:** Filled calendar through my own outreach pipeline, finding enthusiastic hosts in thousands of communities across North America
- **Promoter:** Launched press kit sponsor form that turns bookings into poster, RSVP link, and Eventbrite page on the spot
- **Fundraiser:** Brought in over \$6K, mostly honoraria plus merch sales and donations, while hosts covered flights, car rentals, lodging, and venue space
- **Accountant:** Wrote ledger to reconcile every expense and payment across banks, Venmo, Zelle, and Stripe into monthly summaries
- **Content creator:** Published dozens of videos for my 1.8K supporters on Instagram after editing with DaVinci Resolve and timing subtitles word for word with OpenAI Whisper

Lyrlist · Founder

since Feb 2023

- Developed toolkit for songwriters to discover “artist type beats”, capture song ideas, and overcome writer’s block, earning over \$10K in premium subscription revenue
- Hired and managed team of content creators for marketing campaigns
- Created web scraper to automate outreach to independent artists
- Guided team of college students to design and launch writer’s block screen
- Started label “Lyrlist Records” to independently release original hip-hop music

Azure Incident Management UX since 2024

- Pioneered AI-assisted engineering for Microsoft's incident management mobile app, building library of AI skills that goes from feature description to tested code and prepared pull request in under 30 minutes
- Raised test coverage from single digits to 50% across .NET services and 80% in the mobile app
- Shipped React Native screens with acknowledgement controls that prevented accidental ownership changes, along with native iOS and Android widgets notifying responders of outages immediately, together helping them act faster
- Upgraded on-call portal from legacy Angular to React, improving load times
- Enforced Microsoft's EU Data Boundary commitment end to end, blocking incident data from ever crossing regions

Office Scripts Services 2020 to 2024

- Migrated consent records and authentication away from deprecated data APIs and over-privileged tokens, modernizing REST services and NoSQL storage without disrupting customers or sign-in
- Designed subscription and webhook APIs connecting Excel, Power Automate, and Microsoft Graph so automated flows could start when spreadsheets changed, landing Excel Triggers in private preview and raising service reliability to 99.9%

Office Scripts Team 2019 to 2020

- Wrote TypeScript libraries and REST APIs to save, load, version, and share Excel automations, achieving 100% unit-test coverage
- Added integration tests and CI/CD release gates, protecting every release on the way to general availability in Excel, a modern alternative to macros serving close to 1M monthly customers

Outlook Extensibility Team 2016 to 2019

- Wrote API validation tool for Outlook add-ins across 5 clients: web, Windows, macOS, iOS, and Android, so engineers caught inconsistent API behavior before release and support teams diagnosed failures faster
- Developed JavaScript APIs, React-based mail and calendar add-in support, user-consent flows, and GDPR-compliant unsubscribe handling, helping launch the new Outlook web client without breaking add-ins for millions of customers and developers

SKILLS

Languages	TypeScript · JavaScript · C# · Python · Swift · Kotlin
Stack	React · React Native · Next.js · Node.js · .NET · Supabase · Firebase · Playwright · SwiftUI · Logic Pro · DaVinci Resolve
AI	Claude · ChatGPT · Copilot · Gemini · OpenAI Whisper

EDUCATION

B.S. Computer Science, University of Florida
